Data Analyst | SQL, Power BI and Reporting Automation

SUMMARY

Data analyst with 5+ years in logistics and healthcare finance reporting. Builds SQL reports and Power BI dashboards that operations and finance teams trust, with clear metric definitions and checks.

SKILLS

- **Reporting and BI:** Power BI, DAX, Power Query, Excel, dashboard documentation
- **Data:** SQL, SQL Server, data validation, reconciliation, metric definitions
- **Scripting:** Python (basic), pandas

EXPERIENCE

Data Analyst Mar 2023 to Present

Lakeshore Logistics *Toronto, ON*

- Built a SQL and Power BI depot report that saved 6.5 preparation hours per week across 14 depots.
- Rewrote scorecard labels and definitions, with an estimated 31% drop in repeated dashboard questions.
- Documented owners, refresh checks and metric definitions for 11 Power BI dashboards used by operations.
- Built SQL checks that flag missing depot shipment records before the morning scorecard refresh.
- Trained 9 operations supervisors to read the scorecard and send metric questions to one shared channel.
- Maintain operations scorecards and depot reports in SQL Server, Power Query and DAX, with SQL checks.

Reporting Analyst Jun 2021 to Feb 2023

Westbrook Health Partners *Toronto, ON*

- Built SQL reconciliation checks with a 94.2% match rate between remittance records and the finance ledger.
- Rebuilt the month-end remittance summary in Power Query, cutting manual steps from 12 to 3.
- Automated weekly report assembly and distribution in Excel, saving an estimated 4 hours per week.
- Produced weekly finance reports from SQL Server and Power Query and ran scheduled portal distribution.

PROJECTS

- **Cutoff-date review:** Found why 6 depot reports disagreed and set one shared cutoff definition.
- **Weekly export check:** A pandas script that flags missing or duplicated rows in each depot export.

EDUCATION

Bachelor of Arts, Economics 2021

Toronto Metropolitan University *Toronto, ON*
